Art Unit: 2823

DETAILED ACTION

Priority

1. Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a translation of the foreign application should be submitted under 37 CFR 1.55 in reply to this action.

Drawings

2. The drawings are objected to because the foreign language text is used for labeling of the figures. Applicant is advised to submit new formal drawings which contain Arabic numerals to corresponding figures. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- ((e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by McCarthy (US/6,346,461).

Re claim 1, McCarthy discloses a method of manufacturing a connection substrate, comprising steps of: forming a metal wire (13) on a base (11 12); applying an insulating material (14) onto the metal wire to form an insulation layer (14); forming another metal wire (16) on the

Art Unit: 2823

insulation layer (14), thereby connecting the metal wires (13 15 16) which sandwich the insulation layer (14), through a contact hole (not labeled) formed in the insulation layer (14); and separating the metal wires (13 15 16) and the insulation layer (14) from the base (11) (see Figs. 1-5).

Re claim 2, as applied to claim 1 above, McCarthy discloses all the claimed limitations including the limitation wherein the step of applying an insulating material (14) onto the metal wire (13), and the step of forming another metal wire (16), thereby connecting the metal wires (13 15 16) are repeated at least two times (see Figs. 1-5).

Re claim 3, as applied to claim 1 above, McCarthy discloses all the claimed limitations including the limitation wherein the base comprises glass (see Figs. 1-5).

Allowable Subject Matter

- 5. Claims 5-9 and 11-15 are allowed over prior art of record.
- 6. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record neither anticipates nor renders obvious the claimed subject matter of the instant application as a whole either taken alone or in combination, in particular, prior art of record does not teach "a step of mounting a semiconductor chip on the metal wire which is bared," as recited in claim 5, and "a step of mounting a semiconductor chip on the metal wire that is a step of separating the connection substrate from the second base," as recited in claim 11 respectively.

Claims 6-9 and 12-15 are also allowed as being dependent of the allowed independent base claim.

Application/Control Number: 09/671,884

Art Unit: 2823

Response to Arguments

7. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

8. Applicant's arguments with respect to claims 5-9 and 11-15 have been considered but are most in view of the allowable subject matter that set forth herein above.

Conclusion

9. THIS ACTION IS MADE NON-FINAL.

Correspondence

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brook Kebede whose telephone number is (703) 306-4511. The examiner can normally be reached on 8-5 Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri can be reached on (703) 306-2794. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
